VALMONT

Since its creation, Valmont has been deploying all of its know-how in the field of anti-aging with professional treatments that combine expertise, product performance and accurate gestures.

Valmont drew inspiration from the butterfly – a symbol of metamorphosis, beauty, grace and lightness – in creating the motion that now bears its name. This comprehensive and enveloping motion is used to apply all Valmont products during the treatment. It sets the pace for the treatment, encouraging the client to let go of all stress, and evaporates nervous tension for even more visible relaxation of the features.

The butterfly motion unfolds in a specific series of effleurage strokes targeting precise areas of the chest, neck and face. This gesture boosts the microcirculation and promotes lymphatic exchanges allowing for the elimination of toxins, thereby making the skin more receptive to the treatment.

All Magicien du Temps treatments benefit from this exclusive and original gesture.
